Any person who does any unauthorised act in relation to this publication may be liable to criminal prosecution and civil claims for damages.

Under BTVET Act, 2008, the functions of the Directorate of Industrial Training are:

- (a) To identify the needs of the labour market for occupational competencies that fall under the UVQF.
- (b) To regulate apprenticeship schemes.
- (c) To foster and promote entrepreneurial values and skills, as an integral part of the UVQF.
- (d) To secure adequate and sustainable financing for the efficient operations of the Directorate.
- (e) To accredit training institutions or companies as assessment centres.
- (f) To determine fees payable under the Act.
- (g) To develop, apply, expand and improve the purposeful application of Uganda vocational qualifications defined in the UVQF.
- (h) To assess and award Uganda Vocational Qualifications.
- (i) To promote on-the-job training in industry for apprenticeship, traineeship and indenture training and for other training such as further skills training and upgrading.
- (j) To prescribe the procedure for the making of training schemes.

Further to the above provisions, there is an established Uganda Vocational Qualifications Framework (UVQF), under part V of the BTVET Act, 2008. It is stated that:

The purpose of the UVQF is to;

- (a) Define occupational standards in the world of work.
- (b) Define assessment standards.
- (c) Award vocational qualifications of learners who meet the set standards of different studies.
- (d) Provide guidelines for modular training.

The UVQF shall follow principles of Competence Based Education and Training (CBET) which include:

- (a) Flexible training or learning modules.
- (b) Positive assessment and certification.
- (c) Assessment of prior learning.
- (d) Recognition of formal and non-formal training.
- (e) Self-paced or individual learning.
- (f) Work place learning.

For award and recognition of certificates, the BTVET Act, 2008 provides that:

- (1) The Directorate and other examination boards established under the Act shall award certificates and diplomas for Business, Technical or Vocational Education and Training under the UVQF.
- (2) The Certificates and Diplomas to be awarded shall be in the form prescribed by the Minister on the recommendation of the Industrial Training Council.
- (3) The Certificates and Diplomas awarded under the Act shall be recognised in the Uganda education system and by the labour market.

Under the TVET Implementation Standards 2020, the proposed new mandate of the Directorate of Industrial Training shall be restricted to promoting the highest standards in the quality and efficiency of industrial training in the country and ensuring an adequate supply of properly trained manpower at all levels in the industry and the world of work.

The functions shall include:

- (a) Regulating Industrial Training and Trainers.
- (b) Developing Industrial Training Curricula.
- (c) Harmonising Curricula and Certificates of competence.
- (d) Assessing Industrial Training.
- (e) Development of Occupational Standards and Assessment and Training Packages (ATPs) for Trade Testing for the industry and world of work.
- (f) Awarding certificates in that respect.

At operational level in the Directorate, the Qualification Standards Department performs development tasks related to concepts, procedures and instruments for establishment of the UVQF in close collaboration with both public and private stakeholders in vocational training.

In particular, the Department organises and coordinates the development of Assessment and Training Packages for use in competence-based vocational training as well as standards-based assessment and certification.

The Directorate has therefore produced this Assessment and Training Package for use in implementing Competence-Based Education and Training mechanisms.

Word from Permanent Secretary

The Kajubi Report (1989) and the Uganda Government White Paper on Education Review (1992) emphasised that the Uganda Secondary School Education should be vocationalised.

The World Bank Report on education in Uganda 2007 observed that although Uganda was experiencing steady economic growth on one hand, the secondary education curriculum was inadequately addressing the social and economic needs of the country on the other. The Report further noted that it is not the very top academic cadres that contribute most to the growth of the GDP but rather the competent middle level technicians that are flexible and technologically literate that the economy needs in the labour market at all levels.

Correspondingly, the NDP III 2020/21- 2024/5 highlights (i) low labour productivity (ii) high youth unemployment (38%) (iii) low transition rates from training to employment (35%) as some of the key challenges to Human Capital Development in Uganda.

In order to overcome these challenges, NDP III 2020/21- 2024/5, under objective 2 peaks the need to train the learners for the urgently needed skills and mainstream a dual education and training system. This paved way for the development of the lower secondary school vocational curriculum which supports both academic and vocational training.

The afore is in line with the Uganda Vision 2040. Under section 261, it emphasises that learners will be accorded opportunities to excel in the skills areas they are placed into. These will range from sports and cut to technical and vocational training. Hitherto, section 262 clearly states that the entire education system will be changed to emphasise practical skills, attitude and moral values.

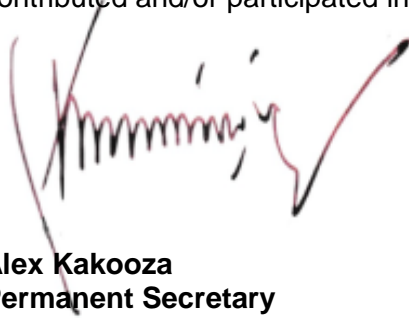

Government of Uganda through the Ministry of Education and Sports rolled out the New Lower Secondary Curriculum in secondary schools countrywide during the first term of the academic year 2020. The overall goal of this curriculum is to produce graduates with employable skills and who are competitive in the labour market. It should be emphasised that vocational training will produce graduates who are employable. In the New curriculum, emphasis will be on equipping learners with employable skills and competencies. This will enable learners perform the requisite duties of the specified occupations. This is the reason why the lower secondary school vocational curriculum was tailored to the assessment requirements of the world of work.

Reading from the Curriculum Framework page 12, it is stated that the learners will be assessed by DIT. Upon assessment and certification, the graduates will be employable and competitive in the labour market. It's against this background that DIT, within its mandate vested in the BTVET Act, 2008 comes on board to take the lead in the development of the requisite Assessment and Training Packages (ATPs) for the various occupations that will be assessed under the Lower Secondary Curriculum.

The ATPs can be used by any training provider and/or those who wish to present themselves for Occupational Assessment and Certification.

Herewith, the Directorate of Industrial Training presents the Assessment and Training Package for training, assessment and certification of a **POWER LINES ELECTRICIAN QUALIFICATION LEVEL 1**.

Finally, I thank all individuals, organisations and review partners who have contributed and/or participated in the review of this noble document.

Alex Kakooza
Permanent Secretary

Executive Summary

This Assessment and Training Package is a Competence-Based Education and Training (CBET) tool and consists of three major parts:

- 0.1 **PART I: The Occupational Profile (OP) of a POWER LINES ELECTRICIAN.**
This Occupational Profile which was reviewed by Power Lines Electricians practicing in the world of work mirrors the duties and tasks that Power Lines Electricians are expected to perform.
- 0.2 **PART II: Training Modules** in the form of guidelines to train Power Lines Electricians both on the job as well as in training centres (or combinations of both venues of learning). The Training Modules herein have been reviewed basing on the Occupational Profile and hence are directly relevant for employment.
- 0.3 **PART III: Assessment Instruments** in the form of performance (Practical) and written (theory) test items that can and should be used to assess whether a person complies with the requirements of employment as a POWER LINES ELECTRICIAN. These assessment instruments were reviewed jointly by job practitioners (Power Lines Electricians) and instructors based on the occupational profile and training modules.
- 0.4 While the Occupational Profile (OP) contained in PART I of this document provides the information on **WHAT a person is expected to do** competently in the world of work, the test items, - including performance criteria- of PART III qualify the **HOW and/or HOW WELL a person must do the job.**
- 0.5 The modular format of the curriculum (PART II) allows learners to acquire job specific skills and knowledge (i.e. competencies) module by module. A single module can be accomplished within a relatively short duration allowing flexibility for learners to move directly into an entry level job, go for further modules or advance to higher levels of training. Modular courses allow more learners to access the training system because training centres as well as companies can accommodate more learners in a given period of time.
- 0.6 In addition to improved access, equity and relevance of BTVET, the UVQF will also enable people who are convinced to have acquired competencies laid down in this ATP through prior training and on-the-job experience to access assessment and certification directly; be it on the basis of a single module, a group of modules or all modules pertaining to the occupation at once. This achievement will facilitate Recognition of Prior Learning (RPL).

0.7 The parts of this Assessment and Training Package were sequentially reviewed as follows:

- i Part 1: Occupational Profile: **August 2020**
- ii Part 2: Training Modules: **August 2020**
- iii Part 3: Assessment Instruments (initial bank): **August 2020**

This ATP (or parts of it) may be periodically revised to match the dynamic trends in the occupation and hence issued in different versions.

DIT takes responsibility of any shortcomings that might be identified in this publication and welcomes suggestions for effectively addressing the inadequacies. The suggestion can be communicated to DIT through P.O. Box 20050, Kampala or through email uvaf.dit@gmail.com.

Patrick Byakatonda
Ag Director

Acknowledgement

The Qualifications Standards Department of DIT wishes to sincerely acknowledge the valuable contributions to the review of this Assessment and Training Package by the following persons, Institutions and organisations:

- Members of the DIT Industrial Training Council,
- The Director and staff of DIT,
- Ministry of Education and Sports,
- The practitioners from the world of work,
- Teachers of Power Lines Electrician from various Secondary Schools,
- Power Lines Electrician Curriculum Specialists from NCDC,
- Examination Specialists from UNEB,
- The facilitators involved in guiding the review panel in their activities,
- The Government of Uganda for financing the review of this ATP.

PPE	Personnel Protective Equipment

Key Definitions

Assessment	Assessment is the means by which evidence is gathered and judged to decide if an individual has met the stipulated assessment standards or not. Testing is a form of formal assessment.
Certification	Certification is a formal procedure to issue a certificate (qualification) to an individual that has demonstrated during formal assessment that he/she is competent to perform the tasks specified in the occupational profile.
Competence	Integration of skills, knowledge, attitudes, attributes and expertise in doing /performing tasks in the world of work to a set standard.
Competency	(Occupational) competence is understood as the ability to perform tasks common to an occupation at an acceptable level.
CBET	Competence-based education and training means that programmes: <ol style="list-style-type: none">1. have content directly related to work2. focus is on 'doing something well'3. assessment is based upon industry work standards, and4. curricula are developed in modular form
Duty	A Duty describes a large area of work in performance terms. A duty serves as a title for a cluster of related Tasks (see also: TASK).
Learning-Working Assignment (LWA)	LWA are simulated or real job situations / assignments that are suitable for learning in a training environment (e.g. "small projects"). In a working environment LWAs are real work situations /assignments.
Modules	Modules are part(s) of a whole curriculum. Modules can be considered as "self-contained" partial qualifications which are described by learning outcomes or competencies and which can be assessed and certified individually.

Occupational Profile (OP) An Occupational Profile is an overview of the duties and tasks a job incumbent is expected to perform competently in employment.

Occupational Profiles developed by practitioners from the world of work enhance the relevance of training and learning to the requirements of the world of work.

Occupational Profiles define what a person is supposed to do in performance terms. It also contains generic information regarding related knowledge and skills, attitudes/behavior, tools, materials and equipment required to perform as well as trends/ concerns in the occupation.

Occupational profiles are the reference points for developing modular curricular and assessment standards.

Qualification A qualification is a formal recognition for demonstrating competence, based on formal assessment against set standards. A qualification is provided to the individual in form of a certificate specifying the nature of the competence.

Task Job Tasks represent the smallest unit of job activities with a meaningful outcome. Tasks result in a product, service, or decision. They represent an assignable unit of work and have a definite beginning and ending point. Tasks can be observed and measured.
(Also see: Duty)

1.0 ATP-PART I

Occupational Profile for a POWER LINES ELECTRICIAN

- 1.1 The OCCUPATIONAL PROFILE (OP) for “Power Lines Electrician” below defines the **Duties** and **Tasks** a competent Power Lines Electrician is expected to perform in the world of work (on the job) in Uganda and the East African region today.
- 1.2 Since it reflects the skill requirements of work life, the Occupational Profile is the reference document for the subsequent development of training modules and assessment instruments (test items) which are directly relevant to employment in Ugandan and the East African businesses and industries.
- 1.3 To ensure that the Occupational Profile is relevant for employment in Uganda and East Africa, the DIT used the method of “occupational/job profiling.”¹

This approach involves the brainstorming of a panel of 8 to 12 competent job practitioners guided by trained and experienced facilitators. During a two-day workshop the panelists define the duties and tasks performed in employment, as well as the prerequisite skills, knowledge, attitudes, tools and equipment, and the future trends and concerns in the occupation/job.

- 1.4 The panelists, facilitators and coordinators who participated in developing this Occupational Profile are listed on the following page.

The DACUM-method was used. DACUM is an acronym for Develop a Curriculum

Dates of workshop: 07th-11th September 2020

NOMENCLATURE FOR THE OCCUPATION OF POWER LINE ELECTRICIAN

Definition: A Power Lines Electrician

Is a person who is able to construct, maintain and repair overhead, underground transmission and distribution lines from the power source to the consumer.

JOB ORGANISATION CHART FOR A POWER LINES ELECTRICIAN

Internal Links

Technical Links

External Links

1. **UVQF Level I Power Line Electrician:** Is a person who can carry out power line activities up to 240V .
2. **UVQF level II Powerline electrician:** Is a person who carries out activities in the power line system up to 415V.
3. **UVQF Level III Powerline electrician:** Is a person who carries out activities in the power line system and supervises work up to 415V.

Duties and Tasks

A. PLAN WORK	A1 Select site	A2 Select tools and equipment	A3 Identify labour requirements
	A4 Prepare maintenance schedule	A5 Prepare work schedule	A6 Obtain material specifications
	A7 Cost work		
B. CONSTRUCT POWER LINES	B1 Interpret power line survey drawing	B2 Select poles	B3 Excavate pits
	B4 Erect poles	B5 Dress poles	B6 String and sag conductors
	B7 Fix jumpers	B8 Lay underground power transmission cables	
C. INSTALL SUBSTATION FITTINGS	C1 Install earth substation fittings	C2 Install transmission transformers	C3 Install transmission protective devices
	C4 Install transmission switch gears	C5 Install distribution switch gears	C6 Install distribution protective devices
	C7 Install distribution transformer	C8 Test installed transformers	C9 Install voltage networks
	C10 Install reactors		
D. MAINTAIN POWER TRANSMISSION SYSTEMS	D1 Replace damaged poles	D2 Replace broken insulators	D3 Fix stays
	D4 Tension sagging conductors	D5 Maintain distribution transformers	D6 Maintain underground power transmission cables
	D7 Maintain switch gears	D8 Maintain underground power transmission cables	D9 Maintain switch gear

E. OBSERVE HEALTH AND SAFETY PRECAUTIONS	E1 Apply IEE rules and regulations	E2 Obtain workers permit	E3 Wear protective gear
	E4 Display safety signs and barriers	E5 Assess and mitigate risks	E6 Clear power line
	E7 Evaluate condition of the poles	E8 Perform safety earthlings of power lines	E9 Administer first aid
	E10 Install firefighting equipment	E11 Store tools and equipment	

F. TEST POWER LINES	F1 Carryout continuity test	F2 Carryout circuit test	F3 Carryout insulation test
	F4 Earth resistance test	F5 Carry out open circuit test	F6 Carryout primary injection test
	F7 Make a snag report		

G. PERFORM ADMINISTRATIVE TASKS	G1 Recruit workers	G2 Assign workers	G3 Supervise workers
	G4 Liaise with stakeholders	G5 Manage finances	G6 Train work
	G7 Pursue professional development	G8 Conduct research	G9 Manage resources
	G10 Keep records	G11 Orient workers	

H. MARKET POWERLINES WORKS	H1 Brand power lines enterprise	H2 Advertise power line works	H3 Network with stake holders
	H4 Sale power services	H5 Communicate with stake holders	H6 Offer discounts
	H7 Price power lines services

Delayed implementation 6. High perseverance rate 7. Poor equipment on market 8. Impastation 9. No risk assessment books 10. Under payment 11. Poor communication 12. No work registers 13. Lines manship should be recognised profession 14. Lines are under paid 15. Lines manship is considered to be for the un educated people 16. Poor follow up and delayed implementation 17. Missing link between industry and training 18. High levels of safety risk</p>

2.0 ATP – PART II

Training Modules for a POWERLINES ELECTRICIAN

- 2.1 A curriculum is a “guide /plan for teaching and learning” which provides a guide to teachers, instructors and learners. In the envisaged system of competence-based or outcome-oriented education and training (CBET), Curricula are no longer the benchmark against which assessment is conducted. It is rather the Occupational Profile that provides the benchmark for Curriculum development as well as assessment.
- 2.2 This modular format of the curriculum allows learners of POWERLINE ELECTRICIAN to acquire job specific skills and knowledge (i.e. competencies) module by module. A single module can be accomplished within a relatively short duration allowing learners to move directly into an entry level job, do further modules and advance to higher levels of training. Modular courses allow more learners to access the training system because training centres, as well as companies can accommodate more learners in a given period of time.
- 2.3 The modules were reviewed jointly by both instructors and job practitioners. They were reviewed using the Occupational Profile as a reference point and taking into account the specifications of training and learning outcomes.
- 2.4 The modules contain “Learning-Working Assignments” (LWAs) and related “Practical Exercises” (PEXs) as key elements.

LWAs are simulated or real job situations/assignments that are suitable for learning in a training environment (e.g. “small projects”).In a working environment, LWAs are real work situations.

PEXs are therefore sub-sets of a LWA.

- 2.5 In principle, and following the philosophy of Competence-Based Education and Training (CBET), the modules can be used as a guide for learning in training Centre, at the workplace; or a combination of both.

WHO IS A POWERLINES ELECTRICIAN- QUALIFICATION LEVEL 1

A Power Lines Electrician is a person who can carry out power lines activities up to 240v.

TRAINING MODULES FOR A POWER LINES ELECTRICIAN UVQ LEVEL 1

Code	Module Title	Average duration	
		Contact hours	Weeks
UE/PLE/M1.1	Develop Electrical Drawing	120	2
UE/PLE/M1.2	Construct Single Phase Low Voltage power lines	720	12
UE/PLE/M1.3	Maintain Single Phase, Low Voltage Overhead Power Line	240	4
UE/PLE/M1.4	Maintenance of Single Phase Low Voltage Underground Cables	240	4
UE/PLE/M1.5	Establish a Power Lines Enterprise	240	4
Summary	5 Training Modules	1560 hours	26weeks

Note: Average duration is contact time but NOT calendar duration

It is assumed that:

- 1 day is equivalent to 8 hours of nominal learning and
- 1 month is equivalent to 160hours of nominal learning

Information given on the average duration of training should be understood as a guideline. Quick learners may need less time than indicated or vice versa

At completion of a module, the learner should be able to satisfactorily perform the included Learning Working Assignments, their Practical exercises and attached theoretical instructions, as the minimum exposure.

Prior to summative assessment by recognized Agencies, the users of these Modules Guides are encouraged to carefully consider continuous assessment using samples of (or similar) performance (practical) and written test items available in part 3 of this ATP.

TRAINING MODULES FOR A POWER LINES ELECTRICIAN

Code	UE/PLE/M1.1
Module title	M1.1: Develop Electrical Drawing
Related Qualification	Part of Uganda Vocational Qualification (Power line electrician UVQ 1)
Qualification Level	1
Module purpose	By the end of this module, a trainee shall be able to sketch, draw and interpret electrical drawings
Learning-Working Assignments (LWAs)	<p>LWA 1/1: Sketch and Draw Electrical Drawings LWA 1/2: Interpret Electrical Drawings LWA 1/3: Perform Occupational Health Safety and Environmental Protection Practices</p> <p>Note:</p> <ol style="list-style-type: none"> 1. The learning exercises may be repeated until the trainee acquires targeted competence 2. The trainer is advised to deliver relevant theoretical instruction with demonstrations as required to perform each learning assignment
Related Practical Exercises (PEXs)	<p>LWA 1/1: Sketch and Draw Electrical Drawings PEX 1.1: Sketch electrical drawings and wirings PEX 1.2: Draw electrical symbols PEX 1.3: Draw block diagrams PEX 1.4: Draw Line diagrams</p> <p>LWA 1.2 Interpret Electrical Drawing PEX 2.1. Interpret line drawings PEX 2.2. Interpret block drawing PEX 2.3. Interpret systematic circuit diagrams PEX 2.4. Survey profiles PEX 2.5. Interpret structural drawings PEX 2.6. Interpret electrical symbols</p> <p>LWA 1/3: Practice Occupational Health Safety and Environmental Protection Practices PEX 3.1: Wear protective gear PEX 3.2: Manage waste PEX 3.3: Practice safe use of tools and equipment PEX 3.4: Sensitise workers on health issues</p>

	PEX 3.5: Administer first aid
Occupational health and safety	Precautions, rules and regulations on occupational health safety and environmental protection included in the listed related knowledge should be observed and demonstrated during LWAs and PEXs
Pre-requisite modules	None
Related knowledge/ theory	<p><i>For occupational theory suggested for instruction/ demonstration, the trainer is not limited to the outline below. In any case related knowledge/ theory may be obtained from various recognised reference materials as appropriate:</i></p> <ul style="list-style-type: none"> • Knowledge on power generation • List types of electrical signs and symbols • List types of electrical lines diagrams • Have an overview of a power line network • Explain general knowledge of algebra, arithmetic, trigonometry, geometric progression series • General knowledge of single phase and three phase circuits • General knowledge of basic of direct current and alternating voltage and current • General knowledge of electrical materials to be used for construction, conducting, resistive, insulating, magnetic materials
Average duration of learning	240hours (15 days) of nominal learning suggested to include: <ul style="list-style-type: none"> • 5days of occupational theory and • 10 days of occupational practice
Suggestions on organisation of learning	The acquisition of competencies (skills, knowledge, attitudes) described in this module may take place at a training center or its equivalent provided all equipment and materials required for training are in place.
Assessment	Assessment to be conducted according to the established regulations by a recognised assessment body using related practical and written test items from item bank
Minimum required tools/ equipment/ implements or	Multi- metre, thermometer, rheostat (variable resistors) switch, power supply units, series and parallel connections, IEE regulation book, drawing

equivalent	instruments (kit) safety operation regulations, heating element.
Minimum required materials and consumables/ equivalent	conductors, resistors, iron fillings wire, compass, needles, magnet (simple bar magnets)
Special notes	

Code	UE/PLE/M1.2
Module title	M1.2: Construct Single Phase, Low Voltage Power Line
Related Qualification	<u>Part of</u> Uganda Vocational Qualification (Power line electrician UVQ 1)
Qualification Level	1
Module purpose	By the end of this module, a trainee shall be able to construct and install overhead conductors and underground cables carrying up to 240v
Learning-Working Assignments (LWAs)	<p>LWA 2/1: Erect Structures</p> <p>LWA 2/2: Install Overhead Conductors</p> <p>LWA 2/3: Install Underground Cables</p> <p>LWA 2/4: Perform Occupational Health Safety and Environmental Protection Practices</p> <p>Note:</p> <p>1. <i>The learning exercises may be repeated until the trainee acquires targeted competence.</i></p> <p>2. <i>The trainer is advised to deliver relevant theoretical instruction with demonstrations as required to perform each learning assignment.</i></p>
Related Practical Exercises (PEXs)	<p>LWA 2/1: Erect Structures</p> <p>PEX 1.1: Interpret survey drawing</p> <p>PEX 1.2: Select tools equipment and materials</p> <p>PEX 1.3: Excavate pit</p> <p>PEX 1.4: Erect poles</p>
	<p>LWA 2/2: Install Overhead Conductors</p> <p>PEX 2.1: Select tools, equipment and materials</p> <p>PEX 2.2: Climb poles</p> <p>PEX 2.3: Dress poles</p> <p>PEX 2.4: Low conductors</p> <p>PEX 2.5: String conductors</p> <p>PEX 2.6: Sag conductors</p> <p>PEX 2.7: Bind conductors</p> <p>PEX 2.8: Fix jumpers</p> <p>PEX 2.9: Install consumer units</p>

	<p>LWA 2/3: Install Underground Cables</p> <p>PEX 3.1. Interpret survey drawing, PEX 3.2. Select poles, equipment and materials PEX 3.3. Excavate pits PEX 3.4. Lay cables PEX 3.5. Terminate cables PEX 3.6. Earth cables PEX 3.7. Install consumer units PEX 3.8. Back fill trench</p>
	<p>LWA 2/3: Practice occupational Health Safety and Environmental Protection Practices</p> <p>LWA 3.1: Wear protective equipment LWA 3.2: Carry out risk assessment LWA 3.4: Display safety signs LWA 3.4: Barricade work area LWA 3.5: Carry out firefighting LWA 3.6: Administer first aid LWA 3.7: Practice safe use of tools and equipment LWA 3.8: Store tools and equipment</p>
<p>Occupational health and safety</p>	<p>Precautions, rules and regulations on occupational health safety and environmental protection included in the listed related knowledge should be observed and demonstrated during LWAs and PEXs</p>
<p>Pre-requisite modules</p>	<p>None</p>
<p>Related knowledge/ theory</p>	<p><i>For occupational theory suggested for instruction/ demonstration, the trainer is not limited to the outline below. In any case related knowledge/ theory may be obtained from various recognised reference materials as appropriate:</i></p> <ul style="list-style-type: none"> • IEE regulation on safety and health practices • Types of first – aid practices • Types of sanitation facilities • Personal hygiene practices • Knowledge about hand/portable tools • Knowledge in digital survey drawing materials • Wastes disposal management • Knowledge of interpreting symbols, signs and drawing

	<ul style="list-style-type: none"> • Types and sizes of pits dug for power structures • Terminate process of stay wire and conductors • Types of cables & Methods of binding • Knowledge about insulation resistance • Knowledge about earthing
Average duration of learning	720hours (90 days) of nominal learning suggested to include: <ul style="list-style-type: none"> • <i>30 days of occupational theory and</i> • <i>60 days of occupational practice</i>
Suggestions on organisation of learning	The acquisition of competencies (skills, knowledge, attitudes) described in this module may take place at a training center or its equivalent provided all equipment and materials required for training are in place.
Assessment	Assessment to be conducted according to the established regulations by a recognised assessment body using related practical and written test items from item bank
Minimum required tools/ equipment/ implements or equivalent	fire extinguisher, dust bins, pangas, axes, bow saw, ladders, climbers, safety belts
Minimum required materials and consumables/ equivalent	conductors, cross arms, pole savers bolts danger plates
Special notes	

Code	UE/PLE/M1.3
Module title	M1.3: Maintain Single Phase Low Voltage Overhead Power Line
Related Qualification	<u>Part of</u> Uganda Vocational Qualification (Powerline electrician UVQ 1)
Qualification Level	1
Module purpose	By the end of this module, the trainee shall be able to perform both preventive and corrective maintenance on electrical overhead power lines of up to 240v
Learning-Working Assignments (LWAs)	<p>LWA 3.1: Carryout Preventive Maintenance on Electrical Overhead Power Lines</p> <p>LWA 3.2: Carryout Corrective Maintenance on Electrical Overhead Power Lines</p> <p>LWA 3.3: Perform Occupational Health, Safety and Environmental Protection Practices</p> <p><u>Note:</u></p> <ol style="list-style-type: none"> 1. <i>The learning exercises may be repeated until the trainee acquires targeted competence.</i> 2. <i>The trainer is advised to deliver relevant theoretical instruction with demonstrations as required to perform each learning assignment</i>

Occupational health and safety	<p>Precautions, rules and regulations on occupational health safety and environmental protection included in the listed related knowledge should be observed and demonstrated during LWAs and PEXs</p>
Pre-requisite modules	<p>None</p>
Related knowledge/ theory	<p><i>For occupational theory suggested for instruction/ demonstration, the trainer is not limited to the outline below. In any case related knowledge/ theory may be obtained from various recognised reference materials as appropriate:</i></p> <ul style="list-style-type: none"> • Types of records used by electrician • Definition of the different types of documents used by electricians • Methods of marketing electrical services • Explaining marketing • Definition of information, communication, and technology. • Benefits of communication and technology <p>Methods of storing tools, equipment and materials used by electricians.</p>
Average duration of learning	<p>240hours (15 days) of nominal learning suggested to include:</p> <ul style="list-style-type: none"> • 5 days of occupational theory and • 10 days of occupational practice
Suggestions on organisation of learning	<p>The acquisition of competencies (skills, knowledge, attitudes) described in this module may take place at a training center or its equivalent provided all equipment and materials required for training are in place.</p>

Assessment	Assessment to be conducted according to the established regulations by a recognised assessment body using related practical and written test items from item bank
Minimum required tools/ equipment/ implements or equivalent	GPS machine, computer, printer, calculator, telephone, mobile phone, electrical tools, and equipment
Minimum required materials and consumables/equivalent	charts, markers, manilas, pens, pencils, reference text books,
Special notes	Emphasis should be put on observing safety regulations

3.0 ATP- PART III

Assessment Instruments for a Power Lines Electrician

- 3.1 Assessment of occupational competence is the procedure by which evidence is gathered and judged to decide if an individual (candidate) has met the stipulated assessment standards.
- 3.2 Assessment of occupational competence should comprise of both practical (performance) testing and written (theory/knowledge) testing.
- 3.3 Based on the Occupational Profile and Training Modules, a combined panel of job practitioners and Instructors reviewed a substantial number of test items for assessing (practical) performance as well as items for assessing occupational knowledge (theory) all stored in an electronic Test Item Bank (TIB) at the Directorate of Industrial Training.
- 3.4 Performance (Practical) Test Items (PTI) are closely related to typical work situations in Ugandan business enterprises. They comprise of a test assignment for candidates and assessment criteria and/or scoring guides for assessors' use.
- 3.5 Written Test items (WTI) for written testing of occupational theory, (knowledge) are presented in different forms which include:
- Short answer test items.
 - Multiple choice test items
 - Matching test items,
- These WTIs herein focus on functional understanding as well as troubleshooting typically synonymous with the world of work.
- 3.6 Composition of assessment/test papers will always require good choices of different types of WTI in order to ensure the assessment of relevant occupational knowledge required of candidates to exhibit competence.
- 3.7 The test items contained in the Test Item Bank may be used for continuous/formative assessment during the process of training as well as for summative assessment of candidates who have acquired their competences non-formally or informally.
- 3.8 In this document, samples of test items for assessing both performance (practical) and occupational knowledge (theory) of a **POWER LINE ELECTRICIAN** are included:

3.9 Overview of Test Item Samples Included

No	Type of test Items	Numbers included
1.	Written (Theory)- (short answer)	2
2.	Written (Theory)- multiple choice	2
3.	Written (Theory)- matching- generic	2
4.	Written (Theory)- matching – cause effect	2
5.	Written (Theory)- matching- work sequence	2
6.	Performance (Practical) test item	1
Total		11

WRITTEN TEST ITEMS

DIT/ QS	Test Item Database Written (Theory) Test Item- no. 1			
Occupational Title:	Power Lines Electrician			
Competence level:	1			
Code no.				
Test Item type:	Short answer	√		
	Multiple choice			
	Matching item	Generic	Cause- Effect	Work-sequence
Complexity level:	C2			
Date of OP:	September 2020			
Related module:	M1.3			
Time allocation:	2 minutes			

Test item	State any two components that are replaced during corrective maintenance of a power line.
Answer space	(i) (ii)
Expected key (answers)	(i) Replace broken conductors (ii) Replace broken poles (iii) Replace blown fuses (iv) Replace broken insulators

DIT/ QS		Test Item Database Written (Theory) Test Item- no. 2			
Occupational Title:	Power Lines Electrician				
Competence level:	1				
Code no.					
Test Item type:	Short answer	√			
	Multiple choice				
	Matching item	Generic	Cause- Effect	Work-sequence	
Complexity level:	C2				
Date of OP:	September 2020				
Related module:	M1.2				
Time allocation:	2 minutes				

Test Item	List any two reasons for earthing a power line
Answer spaces	(i) (ii)
Expected Key (answer)	(i) To maintain the potential differences between earth and neutral at zero (ii) To minimise electric shocks (iii) To allow bond to the earth

DIT/ QS	Test Item Database Written (Theory) Test Item- no.3			
Occupational Title:	Power Lines Electrician			
Competence level:	1			
Code no.				
Test Item type:	Short answer			
	Multiple choice	√		
	Matching item	Generic	Cause- Effect	Work-sequence
Complexity level:	C1			
Date of OP:	September 2020			
Related module:				
Time allocation:	1 minute			

Test Item	Which of the following insulators is used in single phase low voltage power line conductors?
Destructors and correct answer	A. Reel B. Post C. Stay D. Pin

Key (answer)	A
--------------	---

DIT/ QS		Test Item Database Written (Theory) Test Item- no.4			
Occupational Title:	Power Lines Electrician				
Competence level:	1				
Code no.					
Test Item type:	Short answer				
	Multiple choice	√			
	Matching item	Generic	Cause- Effect	Work-sequence

Related module:	M 1.2				
Time allocation:	1 minute				

Test Item	Is a circuit having resistance of 4 ohms causes a voltage drop of 20 volts. Power dissipated in the circuit is?			
Distractors and correct answers	A. 80 watts B. 100 watts C. 5 watts D. 320 watts			

Key (answer)	B			
--------------	---	--	--	--

DIT/ QS		Test Item Database Written (Theory) Test Item- no. 5			
Occupational Title:	Power Lines Electrician				
Competence level:	Level 1				
Code no.					
Test Item type:	Short answer				
	Multiple choice				
	Matching item	Generic	Cause- Effect	Work-sequence	
		√			
Complexity level:	C2				
Date of OP:	September 2020				
Related module:	M 1.2, M 1.3				
Time allocation:	4 minutes				

Test Item	Match the following formulae to the given terms as used in electrical principals
-----------	--

TERM	
1	Voltage
2	Resistance
3	Current
4	Power
5	Energy

FORMULAE	
A	$R = V/I$
B	$I = V/R$
C	$V = IR$
D	$P = IR^2$
E	$E = VIT$
F	$P = VI$

Key (answer)	1:C,2:A,3:B,4:F,5:E,
--------------	----------------------

	Multiple choice			
	Matching item	Generic	Cause- Effect	Work- sequence
			√	
Complexity level:	C2			
Date of OP:	September 2020			
Related module:	M 1.3 ,M1.4			
Time allocation:	4 minutes			

Test Item	Match the following faults to their causes
------------------	--

Faults	
1	Open
2	Short circuit
3	Intermittent supply
4	Earthing

Causes	
A	Live conductor in contact to ground
B	Heavy rain
C	Broken conductor
D	Conductor
E	High temperature

Key (answer)	1:C,2:D,3:E,4:A
---------------------	-----------------

DIT/ QS		Test Item Database Written (Theory) Test Item- no.8		
Occupational Title:	Power LinesElectrician			
Competence level:	Level 1

Test Item type:	Short answer			
	Multiple choice			
	Matching item	Generic	Cause- Effect	Work- sequence
			√	
Complexity level:	C2			
Date of OP:	September 2020			
Related module:	M1.3, M1.4			
Time allocation:	4 minutes			

Test Item	Match the following effects with their causes while working on a power line.
------------------	--

Effect	
1	Fall downs
2	Shakes
3	Body injuries
4	Traffic accidents

Causes	
A	Improper use of safety gears
B	Working alongside the road
C	Use of blunt climbing irons
D	Contact with live current
E	Poor earthing
E	Absence of barricades and working signs

Key (answer)	1:C,2:D,3:A,4:F
---------------------	-----------------

DIT/ QS	Test Item Database Written (Theory) Test Item- no. 9			
Occupational Title:	Power Lines Electrician			
Competence level:	1			
Code no.				
Test Item type:	Short answer			
	Multiple choice			
	Matching item	Generic	Cause-Effect	Work-sequence
				√
Complexity level:	C3			
Date of OP:	September 2020			
Related module:	M1.2, M1.3			
Time allocation:	10 minutes			

Test Item	Re-arrange the following to give the correct order of installing overhead conductors
------------------	--

Column A (chronology)	Column B (work steps) in wrong chronological order	
1 st	A	Sag conductors
2 nd	B	Lay conductors
3 rd	C	Fix jumpers
4 th	D	Bind conductors
5 th	E	String conductors
6 th	F	Climb pole
7 th	G	Dress pole

Expected key (answers)	1-F; 2-G; 3-E; 4-B; 5-A; 6-D,7-C
-------------------------------	----------------------------------

DIT/ QS	Test Item Database Written (Theory) Test Item- no. 10

PERFORMANCE TEST ITEMS (SAMPLES)

DIT/ QS	Test Item Database Performance Test Item- no.11
Occupational Title:	Power Lines Electrician
Competence level:	1
Code no.	
Test Item:	Replace a broken intermediate insulator on a 240v single phase power line
Complexity level:	P 3
Date of OP:	September 2020
Related Module:	M1.3
Related skills and knowledge:	<ul style="list-style-type: none"> • Electrical power equipment's • Measurements with low voltage current electrical Applications • Knowledge on corrective maintenance • Knowledge on safety precautions • Knowledge on voltage levels • Knowledge of operating regulations
Required tools, materials and equipment:	testers, multimeter, operating stick, spanners, pliers, safety belt, protective wear, climbing iron
Time allocation:	4 hours
Preferred venue:	Power line in the Field
Remarks for candidates	<ul style="list-style-type: none"> ❖ Avail protective wear ❖ Observe health, safety and environmental precautions
Remarks for assessors	<ul style="list-style-type: none"> ❖ Provide the tools, equipment and materials listed above

#	Assessment criteria	Scoring guide	Max. Score	
			Process	Result
1	Preparation for task	Wore protective gear Overall Gum boots Head gear Hand gloves		4
		Assembled tools and equipment's		2
		Assembled materials		2
2	Observed safety	Discounted power	2	
		Visible open gap observed		4
		Drove earth electrodes in the earth	2	
		Firmly placed electrodes observed		2
		Connected earth lead to earth electrode	2	
		Firmly connected earth lead observed		2
3	Climbing the pole	Hooked earth wire on neutral conductor first then clamped on the live conductor	3	
		Checked pole	1	
		Put on climbing equipment	2	
		Climbed pole	3	
		Balanced climbing observed		4
		Positioned self	3	
		Adjusted belt firmly fitting around the waist		3
4	Dismantle broken insulators	No tension observed		2
		Unfasten binding wire from one end No damage observed on the binding wire	2	2

#	Assessment criteria	Scoring guide	Max. Score	
			Process	Result
		Completely opened bolts of the insulator	2	
		No damage observed on the bolts		2
5	Replace broken insulator	Rough or white marked side of the insulator faces the pole	4	
		Firmly tightened insulator observed		2
		No cracks on the insulator observed		4
		Wire bound tightly and uniformly		4
5	Descending pole	No tools left on the pole		3
		Adjusted the belt	3	
		Descended pole	2	
		Moved downwards diagonally		3
6	Remove working earth and switched on power	Un hooked working earth using operating stick starting from up down wards	2	
		Use of an operating stick starting from up down wards observed		3
		Restored power	2	
		No visible gap observed		3
	TOTAL		35	51

4.0 ATP- PART IV

INFORMATION ON REVIEW PROCESS

4.1 Occupational Profile Review (September 2020)

The Occupational Profile was exclusively reviewed by job practitioners who were working in the Power line occupation. The job expert panel, guided by UVQF Facilitators defined duties and tasks performed and provided additional generic information regarding the occupation.

4.2 Training Module Review (September 2020)

Based on the Occupational Profile for Power Lines Electrician of September 2020, Training Modules were reviewed by job practitioners, guided by UVQF Facilitators.

4.3 Test Item Review (September 2020)

Based on the Occupational Profile for Power Lines Electrician of September 2020 and Training Modules, Test Items were reviewed by combined panels of instructors and job practitioners, guided by UVQF Facilitators.

4.4 Methodology

The rationale for the Assessment and Training Package review was to link Vocational Education and Training to the real world of work by bridging Occupational Standards to Training Standards through industry-led Standards-Based Assessment.

Active participation of both instructors and job practitioners' panels consolidated the development philosophy.

The panelists worked as teams in workshop settings complemented by off-workshop field research and literature review activities including international benchmarking.

4.5 Review Panels

The participating panels of Job Practitioners required at different stages were constituted by members from the following organisations:

	Review panel	
	Name	Institution/ Organisation
1.	Kyembe Fahadi	Umeme Ltd
2.	Asaanidde Saved	Umeme Ltd
3.	Bibino Bernard	Bweranyagi Girls SS
4.	Batya Daniel	Ntare school
5.	Tumwine Francis	Mbarara High School
6.	Micheal Twikirize	Rural Electrification Agency
7.	Mutibwa Francis Emmanuel	Mt. St. Marys College Namagunga

4.6 Facilitator team

This Assessment and Training Package was reviewed by a Facilitator team listed below:

1. **Team Leader:** Ms. Mukyala Ruth Ag Deputy Director, DIT
2. **Facilitators:** Ms. Aheebwa Joan and Ms. Kyatuhire Fortunate
3. **Data Entrant:** Ms. Nakigozi Monica, Mr. Ivan Nkalangwike and Mr. Pius Najooma
4. **Complied by:** Mr. Ivan Nkalangwike
5. **Edited by:** Ms. Mukyala Ruth Ag Deputy Director, DIT
6. **Coordinated by:** Mr. Byakatonda Patrick, Ag. Director, DIT;

4.7 Reference time:

The Assessment and Training Package was reviewed in September 2020 and may be periodically revised to match the dynamic trends in the occupation and hence issued in different versions.
